HAOSEN (RUSSELL) XING

haosenx (at) andrew dot cmu dot edu; http://russellksing.github.io; 949-537-6300

Research Interests

Legged Robots, Dynamic Locomotion, Biomechanics,
Optimal Control and Real-time Optimization of Human Assistive Devices
Reinforcement Learning / Deep Learning for Locomotion

Education

M.S. Mechanical Engineering, Carnegie Mellon University — May 2019
- Advisor: Prof. Howie Choset

B.S. Mechanical Engineering, University of California, Irvine — Jun 2017
- Graduated with *Cum Laude* honor

Proficient Skills

Knowledge: Biomechanics, Locomotion, Control Theory,
Mathematical Modeling, Engineering Optimization, Robot Dynamic Analysis,
(Deep) Reinforcement Learning, Machine Learning, Finite Element Analysis
Design: SolidWorks, Rhino
Programming: Arduino, C++, MATLAB, Python (PyTorch),
Tools: LaTeX, Mathematica

Research Experience

Research Intern, Carnegie Mellon University, PA — Nov 2019 – Current
(Advisors: Prof. Hartmut Geyer and Prof. Chris Atkeson)
- User and Environment Interactive Planning and Control of Artificial Lower Limbs for Resilient Locomotion

Research Intern, Carnegie Mellon University, PA — Jun 2019 – Current
(Advisors: Prof. Chris Atkeson and Dr. Ge Lv)
- Task-invariant control and experimental testing of lower-limb exoskeletons

Graduate Research Student, Carnegie Mellon University, PA — Oct 2017 – May 2019
(Advisor: Prof. Howie Choset)
- Improving stability in diagonal sequence walking gaits using inertial tail appendage in Quadrupeds;
- Improving static stability in diagonal sequence walking gaits using tail;
- Designing legged system gaits and analyzing stability using Hildebrand diagram;
- Geometric mechanics and quadruped back-bending

Research Intern, Zhejiang University, China — Apr 2017 – Jun 2017
(Advisor: Prof. Dongliang Zhang)
- Lower-body fitting robot CAD design and control

Undergraduate Research Assistant, University of California, Irvine — Mar 2016 – March 2017
(Advisor: Prof. John Larue)
- Analyzing the decay of kinetic energy downstream with turbulence using wind tunnel

Undergraduate Research Assistant, University of California, Irvine — Mar 2016 – Jun 2016
(Advisor: Prof. Yun Wang)
- Designing a micro generator for small-size electronic devices

Leadership, Honor and Activities

UCI SAE Savage Team – Aero/Body Team Leader
UCI Deans Honor List (2013 - 2016)
Pi Tau Sigma Honor Society (Former Vice President)

Publications

G. Lv*, **Haosen Xing***, J. Lin, R. Gregg, and C. Atkeson, A Task-Invariant Learning Framework of Lower-Limb Exoskeletons for Assisting Human Locomotion, submitted to **American Control Conference, 2020**

Academic Projects

Carnegie Mellon University

- Obstacle Avoidance Trajectory Optimization (Course: Engineering Optimization)
- Policy Gradient Tutorial (Course: Statistical Techniques in Robotics)
- Grid World Navigation Using Deep Reinforcement Learning (Course: Deep RL & Control)
- Develop a Simple Image Processing Application Named FinePixel Using C++ (Course: Engineering Computation)

Academic Services

Conference Reviewer

- Robotics: Science and Systems, 2019

Courses Highlighted

Engineering Optimization (24-785)
Machine Learning (10-601)
Deep Reinforcement Learning and Control (10-703)
Robot Dynamics and Analysis (24-760)
Statistical Techniques in Robotics (16-831)
Sensing & Sensors (16-722)
Kinematic, Dynamic and Control (16-711)
Engineering Computation (24-780)
Numerical Method in Engineering (16-831)
